Taiwan Excellence award-winning anti-epidemic products to fight global COVID-19 outbreak

Taiwan's medical care system has been widely recognized globally for its exceptionally high standards of public health and epidemic prevention networks, and also for its medical products. Exports from Taiwan's medical device industry reached approximately US\$3.3 billion in 2019, and is expected to be in the top 20th in export value in the world.

In 1993, Taiwan's government established the Taiwan Excellence Awards, and award-winning products represent the very best of Taiwan's most outstanding products, selected through a vigorous competition process that focuses on products which offer quality, design and innovation for customers.

This year, there are 37 winners for Taiwan Excellence Awards in the medical related category. The following are among the most popular and bestselling epidemic prevention products in Taiwan:

● Infrared non-contact forehead temperature thermometer

The Microlife non-contact thermometer NC 200 enables taking an accurate measurement automatically within 5 cm.
