

Dear Investors,

Prof. Ph.D Hristijan Mickovski
President of the Government
of the Republic of N. Macedonia

My country Macedonia is entering a new era of opportunity. Since 2024, my government has taken a proactive approach to reforms, ensuring a stable, transparent and investor-friendly environment. Guided by the National Development Strategy 2024–2044, we are laying the foundations for sustainable growth, competitiveness and innovation.

Costs for doing business remain attractively low, and with upcoming reforms, investors can ride the wave of future improvements and **secure above-market returns**. The government is committed to providing direct support and assistance in overcoming administrative challenges, ensuring that your investment journey is smooth and successful.

Recent data show that our country now ranks as the **fifth fastest growing economy in Europe**. This remarkable progress is the result of the new government's proactive policies and reforms. What just a few years ago was a stagnant economy has now become a dynamic and expanding one, offering investors confidence in both immediate opportunities and long-term success.

Strategically positioned as **a regional hub**, my country offers investors a unique advantage: a base to serve both the Western Balkans and wider European markets. We have already welcomed leading global companies, and we are determined to expand this success even further.

Now is the time to invest. We invite you to join us in shaping a prosperous future, where your investment in our country becomes a gateway to regional and European success.
